

FOR IMMEDIATE RELEASE

Auto Body World Awarded as Nation's "Top Shop" by Automotive Body Repair News (ABRN).

PHOENIX, AZ – November 25, 2009

Auto Body World was awarded First Prize by ABRN in its inaugural "2009 Top Shop" national competition. This award recognizes Auto Body World for its market-leading performance and for its design and implementation of a new industry-leading collision repair process - called the Rapid Production Model (RPM).

"Every successful business model is supported by a single, standard way of doing business. This standard is essential to delivering a consistent and irresistible customer experience. And so, we are no different. In order for us to grow our business and achieve our vision of being Arizona's leader in collision repair, we had to design a world class, replicable prototype that delivered among the best quality, speed, and satisfaction results in the industry. We are extremely excited and honored that ABRN has awarded us as their 2009 #1 TOP SHOP for doing exactly that," says David Fait, CEO of Auto Body World.

Auto Body World will appear on the cover of the December 2009 issue of ABRN's monthly trade magazine, with a detailed feature article highlighting the Company's business model and accomplishments in the collision industry.

About Auto Body World
